To : Doctors

Dear Doctor,

Medi2000 Clinic Management Software

Thank you for your interest in our Medi2000 Software.

Medi2000 is developed by a team of software engineers with more than 10 years of experience in running Clinics & Hospitals information technology systems. It is currently one of the software in the market that capitalises on the advance windows & Internet technology and yet provide a user-friendly interface for clinic operating environment.

Features:

- Very efficient operation. Proven to handle heavy transactions under single and multi-users environment. Effort has been made to make software keystroke and mouse friendly.
- Versatile charging structure. Ideal for 24-hour clinic operation.
- Comprehensive management of corporate accounts including co-payment, capping, admin fees etc.
- Software can be customised easily to meet your additional needs in areas of Managed care etc. Reports and labels can also be designed and customised easily.
- Using highly robust and stable SQL database with auto-recovery (no re-indexing required).
- Clinic Modules include Queue, Registration, Dispensing, Appointments, Inventory, Corporate Billing, Medical Records, MC, Receipts, AR and AP Aging reports, Comprehensive security and many more.
- Using advanced multi-tasking features. Multiple modules can be activated at the same time to increase productivity.
- Software is designed for future growth. It can run as a Stand-alone system, Multi-user or Client Server based system which connects to SQL, and other back end database server.
- Software runs on Windows 95, Windows 98, Win ME, Win NT, Windows 2000 and XP. Software is designed to capitalise on the latest technology.
- Minimum systems requirement : Pentium II processor, 200 Megabytes of Hardisk , 64 Meg Ram.
Recommended systems : Pentium 500Mhz, 64M Ram, 1GB Hardisk, 56k Modem, Internal Zip Drive for Backup, second printer port (if receipt & MC printing is required).
